

SUSTAINABLE AMMUNITION SUCCESS

over **3,000**

people have tried sustainable ammunition at BASC events across the UK since 2020.

Shooting
AND CONSERVATION

40+

articles about lead-free ammunition have been published in BASC's bi-monthly membership magazine, *Shooting and Conservation*, since 2020.

The **4** main UK cartridge manufacturers have lead-free game loads on the market with plastic-free wads.

70%

of shoots said they would be able to insist on Guns using lead-free ammunition for the 2022/23 season.

43%

of shoots were either going lead-free or were going to encourage the use of non-lead shot.

60%

of Guns either planned to go lead-free or liked the idea of switching to lead-free ammunition for the 2022/23 season.

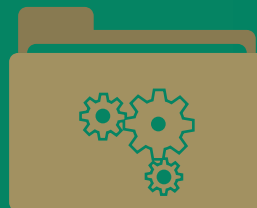

77%

of Guns would be happy to change if a shoot asked them to switch to using non-lead cartridges.

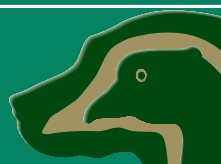

150 parliamentarians have been briefed by BASC on the transition away from lead shot. Through BASC-drafted questions, parliament has discussed the transition away from lead shot 19 times.

280 pages of technical reports were produced by BASC in response to the Health and Safety Executive's consultation on lead ammunition.
